

COMMUNIQUE

To: All user groups, boarders, board members, haul-ins, chiropractors, farriers, saddle fitters and any other person's parking inside the facility gates.

Please accept this correspondence on behalf of the Prince George Horse Society Executive Committee as it relates to some on-going challenges at the Prince George Horse Society Facility.

On-Going Parking Challenges

In an effort to address the on-going parking challenges, the PGHS Executive and the City of Prince George have collaborated to provide direction and support to address these challenges, as follows:

1. PGHS Approved Parking Map – areas identified in yellow are approved parking locations on the facility grounds (map attached)
2. PGHS Approved Overflow Parking Map – identifies overflow parking beside the gymnastics club, as approved by the City of Prince George (map attached)
3. Unloading Area Adherence – this area is solely for the purposes of unloading your horse(s). Once unloaded, you are **required** to move your truck and trailer to an approved parking location.
4. Parking Area Cleaning – user groups (if an event booking) or individual users are responsible for cleaning up after themselves at their truck and trailer parking location. If facility staff must do the cleaning, the user group or individual will be billed for our staff providing this cleaning service.

We hope that by providing clear guidelines there will be no further parking issues.

PGHS Executive Committee
